Abstract

Entrepreneurship, in changing time and economy is no doubt a complex phenomenon. In present environment focus has to be directed towards steps to be taken to fulfill requirements of Government policies external and internal embedded with unavoidable multiple constraints and very stringent parameters to be strictly adhered to. Study evolves the reviewing of a) Assistance available from State and Central government for entrepreneurial development and additional participation required from government to meet these challenges b) Roles of financial institutions with additional responsibilities to fulfill this requirement c) Internal and External factors, which may influence the working of an entrepreneur and strategy to tackle these factors optimistically d) Problems an entrepreneur generally faces and possible positive remedial solutions to overcome.

It is obvious from above that the objective of the study is to understand the need from the system and environment to facilitate an entrepreneur to foray his entrepreneurship in light of innumerable constraints.

Keywords: Entrepreneurship, Entrepreneurial Culture, Role of Government and Financial Institutes in Entrepreneurial Development, Internal & External Factors affecting Entrepreneurs, Entrepreneurship in Uttar Pradesh.

Introduction

Entrepreneurship in present era means the activities and involvements of an entrepreneur in dynamic and unpredictable scenario. Word entrepreneurship is transforming fast with the passage of time and status of economy. Presently in that dynamic entrepreneurship let's try to focus on the environment as a pipeline through which entrepreneur has to traverse through. This pipeline constitutes of Government policies and support, environment (both external and internal), other multiple unavoidable constraints and very stringent parameters to be strictly followed.
